FREE GUIDE · CLINIC OWNERS & MANAGERS

Patient Experience *Audit* *Scorecard*

Score your clinic at six moments that shape how patients feel — from the first call to the follow-up — and turn the low scores into a plan.

03

Nikhila (Nikki) Mamanduri
Healthcare Operations Manager · MHA, CAPM

WHY IT MATTERS

Patients judge the whole journey, not just the visit.

How people are welcomed. How clearly expectations are set. How confidently questions are answered. How consistently the team communicates. Those things don't happen by accident — they're shaped by the systems, standards and culture we build.

This scorecard walks the patient journey in six touchpoints. Score each statement from **1 (rarely true)** to **5 (always true)**. Do it twice: once yourself, once with a front-desk team member — the gaps between your scores are often the most useful part.

Tip: score from real evidence — a mystery call, a walk through the waiting room, reading the last 20 reviews — not from how things are supposed to work.

01 First contact

Statement	Score
Calls are answered or returned the same business day.	1 2 3 4 5
New-patient enquiries get a response quickly and consistently, by phone or online.	1 2 3 4 5
The first conversation explains cost, insurance and what to expect.	1 2 3 4 5

02 Scheduling

Statement	Score
Patients can get a reasonable appointment without multiple calls.	1 2 3 4 5
Confirmations include date, location, what to bring and how to reschedule.	1 2 3 4 5
Reminders arrive before the visit with an easy way to confirm.	1 2 3 4 5

03 Arrival & check-in

Statement	Score
Patients are greeted by name within a minute of arriving.	1 2 3 4 5
Paperwork is mostly done before arrival.	1 2 3 4 5
Wait times are communicated honestly if we're running behind.	1 2 3 4 5
The waiting area is clean, calm and accessible.	1 2 3 4 5

04 The visit

Statement	Score
Patients understand the plan and next steps before they leave the room.	1 2 3 4 5
Questions are answered confidently, without rushing.	1 2 3 4 5
Hand-offs between team members are smooth — patients don't repeat themselves.	1 2 3 4 5

05 Checkout & billing

Statement	Score
Patients know what they owe and why.	1 2 3 4 5
Next appointments are booked before leaving when needed.	1 2 3 4 5
Billing questions get a clear answer from one person.	1 2 3 4 5

06 Follow-up

Statement	Score
Results and next steps are communicated when promised.	1 2 3 4 5
No-shows and lapsed patients are contacted kindly, not just flagged.	1 2 3 4 5
Feedback and reviews are read and acted on, and the team hears about the good ones.	1 2 3 4 5

TURN SCORES INTO ACTION

Reading your results

Touchpoint average	What it means	Do this
4.5 – 5	A strength	Document it in an SOP so it stays consistent; celebrate it with the team.
3.5 – 4.4	Mostly working	Find the one statement pulling it down and fix that step.
2.5 – 3.4	Inconsistent	Usually depends on who's working — write the SOP and train to it.
Below 2.5	A pain point	Make it one of your top three priorities this month.

Action plan

Touchpoint	Lowest-scoring statement	One change we'll make	Owner	By when

Make it a habit. Re-score every quarter and share the trend with your team. When patients consistently describe feeling welcomed, informed and supported, that tells you something important about the environment being built around their care.

NEXT STEP

Want an outside view of *your patient journey?*

I can walk through your scorecard with you and suggest the operational changes that will move the lowest scores first. Start with a free 15-minute intro call.

Session	Length	Price	Best for
Intro call	15 min	Free	Say hello and see if we're a fit.
Mentoring chat	30 min	Free	Career questions, MHA advice or a resume review.
Working session	60 min	On request	A focused session on your clinic or project.

About Nikki. Nikhila (Nikki) Mamanduri is a Healthcare Operations Manager at Medi-Weightloss® Thousand Oaks with an MHA from the University of New Haven (3.79 GPA) and PMI's CAPM®. She has worked across medical devices (Relisys), dialysis (U.S. Renal Care), academic medicine (Tufts Medicine) and clinic operations, and believes better systems create stronger teams — and a better experience for every patient.

This guide shares general operational practices for educational purposes. It isn't legal, billing-compliance, immigration or medical advice — check payer rules, your organization's policies and the relevant authorities for your situation.
